Qualification

COMSATS University Islamabad
BS Computer Science
2018 - 2022

Summary

Results-driven mobile application developer with 20 months of experience at Gameotivity, Smartkalls Inc, and Codistan Ventures, where my strong problem-solving skills led to the creation of robust, user-friendly apps that boosted audience engagement and hiked revenue growth. As a Level 2 freelancer on Fiverr, I've completed over 150 orders for clients in 30+ countries, maintaining a 4.9/5 rating. As a lifelong learner, I continuously explore new tools with the goal of becoming a full-stack developer.

Experience

Cross-Platform App Developer

Codistan Ventures | 06/2024 - Present

Currently leading the development of the Campsites app, reducing load times by 20% and improving response to under 150 ms, Integrated third-party services like Google Maps, Stripe, and OneSignal and contributing to over \$50,000 in monthly revenue. Enhanced user onboarding with Apple/Google Login, cutting user drop-off by 30%, and preparing for deployment on both Google Play and Apple App Store, driving expected growth in user engagement and company revenue.

Mobile App Developer

Smart Kalls Inc | 10/2023 - Present

As a part time employee, developed user-friendly and powerful projects like Paygeon, an American Client-Broker app and some specific modules of other projects, resulting in a 25% increase in company clients and noticable 53% rise in project purchases. Oversaw bugs, achieved a 40% reduction in response times and implemented client feedback to enhance user experience, leading to a 20% boost in client satisfaction ratings and contributing to an approx \$700,000 in annual revenue for the company.

React Native Full Stack Developer

Gameotivity LLC | 07/2022 - 08/2023

As a fresh graduate, I managed the development of the Gameotivity mobile and web app and the UniConnect app, which became the backbone of the startup company. My contributions led to a 40% increase in website clicks and a substantial monthly revenue growth for the startup. Additionally, I trained multiple interns and managed client relationships, resulting in a 30% increase in client retention and 100% on-time delivery of projects. Through these efforts, we achieved a 25% growth in active users over six months, significantly boosting our market presence.

Freelance Experience

Mobile/Web/AI/Graphics

Fiverr | 02/2023 - Present

Successfully completed 150+ orders with an average rating of 4.9/5 and a 10/10 success score. Maintained an 89% order's completion rate while serving, 140 unique clients from 30+ countries and 100% on time delivery. Currently recognized as a Level 2 Seller and featured in Fiverr's choice listings on several pages, demonstrating my commitment to quality and client satisfaction.

Projects

These selected projects represent some of my best work, showcasing my expertise and accomplishments:

Crowdly

2021 – 2022

Final Year Project – Nominated Open House Expo 2022

- A social media app featuring social media, real-time messaging, food ordering, cab booking, blood donation coordination, and a support chatbot.
- Developed using React Native, Firebase, Socket.IO, Gifted Chat, Redux, React Navigation, React Native Maps, and much more.

Gameotivity Mobile/Web App

2022 – 2023

- A gaming mobile app featuring deep linking for seamless navigation, an animated frontend with mirror effects, transparent animations, and shadow backgrounds, creating an immersive user experience.
- The project also includes a web version built using React.js. URL is 'https://gameotivity.net'.
- Developed using React Native, React.js, Animation libraries, React Navigation, React Router and various essential web and app frontend libraries.

Paygeon

2023 – Onward

- A client-broker application featuring robust chat functionality, dynamic invite links, and three distinct user interfaces for admin, brokers, and regular users.
- Developed using React Native and Firebase (Authentications, Firestore, Cloud Storage, Dynamic Links), Stripe, OneSign

Campsites

2024 – Onward

- A camp booking application includes multiple authentications such as Apple and Google auth, community follow/unfollow functionality, private/group chats, maps with directions, geofencing and complex style, a review system for campsites, referral codes, payment processing, and push notifications.
- Developed using React Native, Socket.IO, Stripe, OneSignal, and React Native Maps.

ConvoVision

2024

- An AI-powered application designed to assist non-speaking individuals through text and voice-to-text functionalities. It utilizes generative AI models like OpenAI for natural language responses, DALL-E for image generation, and Smart AI for enhanced contextual understanding, allowing users to input queries and receive intelligent text or visual responses.
- Developed using React Native, OpenAI, DALL-E, and Voice-to-Text APIs.

Steganography Image Encryption

2019

- A semester project, which used Python, contains a functionality of encrypting a text message inside an image.

Gym Management System

2018

- A semester project, which used Python, contain full Gym management functionalities, from login to exercises, billings, updates, removals and much more.
